

KNX 1280A POWER SUPPLY

ALM 1280

GENERALIDADES

- ALM1280 is a KNX power supply with an output current of 1280 mA, high efficiency and small dimensions.
- The device is equipped with overload/short circuit and output overvoltage protection. It features a KNX output with an integrated coil and an additional output for auxiliary power supply.
- Diagnostic LEDs indicate normal operating states, overload and overvoltage conditions, and the RESET state.
