

DOMESTIC GAS DETECTORS

DGD 118 - 218

APPLICATION

- This device is a flammable gas leakage domestic detector. When exposed to a gas concentration much lower than the danger level, the detector turns on a red light and a buzzer, then, after 5 seconds it, turns on a relay which can be used to stop the gas supply.

Features

TECHNICAL DATA

- LPG version: DGD 218
- Methane version: DGD 118
- Replaceable semiconductor sensor
- Power supply 230V~
- Buzzer and relay in case of alarm
- Alarm test key
