

GAS LEAK DETECTOR FOR DOMESTIC CO (CARBON MONOXIDE) STORAGE
WITH OUTPUT RELAY

DGD 318

GENERALIDADES

- This detector is a microprocessor based electronic device that answers all needs of safety in those cases in which there can be CO production (e.g. where heating or coking appliances can have uneven combustions).
The device is designed so that it simulates the behaviour of the human body accumulating the gas.

CARACTERÍSTICAS TÉCNICAS

TECHNICAL DATA

- Replaceable electrochemical sensor
- 230V~ power supply
- Buzzer and relay in case of alarm / fault
- Alarm test / Alarm mute button
- Start counting threshold: 30 ppm (50 mg/m³)
