MULTIFUNCTION PRESENCE SENSOR

PDK 002

APPLICATION

• IKONEX presence detectors are designed primarily for use in indoor spaces.

• The Coster range of presence sensors is suitable for ceiling mounting and can be flush or surface mounted.

• IKONEX presence sensors support presence, brightness, movement, temperature and external temperature detection.

• All versions are equipped with a rear connector with 3 digital inputs that can be connected to buttons and used for the switching sensor, switching/dimming sensor, shutter sensor, forced value/operation, scene control, RGB colour control and HVAC mode selection control.

• Temperature measurement via integrated sensor, analogue input, KNX temperature sensor with the option of sending the value to the bus when it changes and periodically for room temperature monitoring.

• IKONEX presence sensors have 5 logical function blocks and can be set according to the AND/OR/XOR logical relationship. Each block can control 5 output objects.
