

SWITCHING ACTUATOR

RAK 002

APPLICATION

- RAK 002 is a 2-channel switching actuator that can also be configured as a 1-channel Venetian blind actuator. It is equipped with two binary inputs for switch box mounting, to which dry contacts can be connected. These inputs can be locked independently or perform different functions. An additional binary input allows the connection of, for example, a remote temperature sensor (NTC)
