

MBUS-MODBUS CONVERTER

CDP ...

APPLICATION

- Since the data from CDP180/120 converters can be read from any Modbus-Master (automated control, visualisation system etc...) a very broad range of applications becomes possible.

Features

- For instance data from a heat meter can be easily represented on a information display. Each of our MBUS/MODBUS converter modules can read the data from up to 2 or 8 Meter bus unit loads (1 unit load corresponds to 1,5 mA current consumption of one participant), depending on the type of converter

Code	Description	Data Sheet
CDP 120	Mbus-Modbus converter 2 devices	-
CDP 180	Mbus-Modbus converter 8 devices	-
