

## NETWORK MANAGER MODBUS - WEBGARAGE EMBEDDED

### YHC CWE

#### APPLICATION

- YHC 700 is an integral part of the platform for the regulation and control of YLC Series plant and of monitoring systems
- It can be configured to periodically send the data gathered from the devices to the Cloud via HTTPs
- It can be connected to the CDP 180 and 120, for M-BUS devices integration\*
- It can periodically log the monitoring devices data, with the possibility of exporting the log file (CSV format)\*
- Communication with the supervisor can take place either in ModBus/TCP-IP or in ModBus/RTU
- Connection to the Internet is preferable but not mandatory
- Its SW can be updated remotely or locally
- The WEBGarage software is onboard to support Y-series & third parties integration

**Download software YHC CWE** (requires log-in to the site)

#### Revision History

#### Features

#### TECHNICAL DATA

- Power supply: 12V
- 6 DIN module case
- 1 RS-232 Port
- 2 RS-485 Ports
- 1 Ethernet Port
- 1 micro-USB Port
- 1 USB Port
- 4 LEDs
- WEBGarage 200 points-license embedded (40 points historicized)
